

FEATURED TESTIMONIALS 2023

MT-1: ESSENTIAL PERIPHERAL SEMINAR

"I really enjoyed the content and delivery of content. I liked the size of the group and felt it was very conducive to learning. I will take another!"

-Stephanie Fulton, MT-1 Clemmons, NC, February 2023

"I liked it so much I plan to take the next course MT 2"

-J. Messano, MT-1 Clemmons, NC, February 2023

"Great course! I plan on attending future MAPS courses and hope to earn my COMT!"

-Zachary Coleman, MT-1 Clemmons, NC, February 2023

"Hands-on learning/ability to watch a live demonstration and have time to practice new skills."

-Brittany Smart, MT-1 Clemmons, NC, February 2023

"Instructor assessing REAL patients in front of the class and then explaining his clinical reasoning and discussion the eval and plan of care. It was extremely beneficial to watch Cory assess the REAL patients and apply the concepts we learned in MT 1 and incorporated others from MT 2.

I look forward to taking MT 3. Thanks Cory! "

-Devin Charles Sweeney, MT-1 Clemmons, NC, February 2023

"The pace of learning was great. Frequent rest breaks to avoid getting overwhelmed with content. Repetition of skills to ensure learning. The instructor was clearly very knowledgeable and offered good clinical insights"

-Marisa Harding, MT-1 Blue Bell, PA, November 2022

"I loved how hands on this course was and how much time we're able to practice each skill. It was favorable for learning to have this course taught in a hybrid style. I liked how the instructor gave an example with a REAL patient, and how we did "round robin" practice of techniques at the end of the course"

-M. Herting, MT-1 Blue Bell, PA, November 2022

"I enjoyed how interactive and hands on this course is. Our instructor Addison was very attentive with providing feedback throughout the hands on learning portion."

-Jessica DiGennaro, MT-1 Blue Bell, PA, November 2022

"Addison did a wonderful job explaining, showing, and instructing techniques."

-C. Schuetz, MT-1 Blue Bell, PA, November 2022

"I loved how the entire session was formatted, everything fit together very well. I never felt like we were jumping between topics, things were very cohesive. The instructor was very informative and kind, would love to learn from her again!"

-Gianna Wallace, MT-1 Blue Pell, PA, November 2022

"Great course, very hands on and informative, I would recommend course to a friend."

-J. Blazey, MT-1 Blue Bell, PA, November 2022

"I loved how we began with assessment and then incorporated the assessment immediately into tx. I also liked how it was structured with the instructor demonstrations and break out sessions throughout. This was very engaging. Dhinu was an OUTSTANDING instructor and I learned a ton. I will be taking the Maitland framework of assessment and tx into my practice. I thoroughly enjoyed every part of the seminar."

-Bryce Baughman, MT-1 Washington, DC, September 2022

"Dhinu did a great job with catering the class to the Therapists' needs and concerns. Good foundational course for introduction to Maitland concepts."

-John Wilkinson, MT-1 Washington, DC, September 2022

"I really enjoyed the amount of time that was dedicated to the hands-on techniques. The format and organization of the course was appropriate and made sense."

-Angel Ramos, MT-1 Camarillo, CA, May 2022

"I enjoyed observing treatments with real patients. The instructor and lab assistant were extremely helpful with explaining material and providing constructive feedback."

-Priscilla Chi, MT-1 Camarillo, CA, May 2022

"The instructor was amazing and knowledgeable. She made it fun and obviously knew the topic and taught it well."

-Tami Reynolds-Call, MT-1 Camarillo, CA, May 2022

"What I liked most about this course would have to be the hands-on aspect of the class. This component was informative, specifically with hand placement, on certain bony prominences and such, for proper motion engagement. "

-Lupe Ortega, MT-1 Camarillo, Ca, May 2022

"The instructor was engaging and gave real world examples of how to apply an alter treatments based on own experience and expertise and appropriate moments."

-Justin Rosinski, MT-1 Louisville, KY, May 2022

"The teacher made the course! Norm kept our attention and everything made sense; He was personable and approachable. This has been the best course I have taken to date in my 6 years of experience."

-Julie Ballinger, MT-1 Louisville, KY, May 2022

"Look forward to incorporating these theories and techniques into my clinic skills to help enhance patient quality of care"

-Josh Taylor, MT-1 Louisville, KY, May 2022

"MAPS opened my eyes on new ways of dealing with joint issues."

-Anthony Ling, MT-1 New York, NY, April 2022

"I enjoyed the in person lab where we were able to try our techniques along with the constructive criticism provided by the instructor was extremely helpful. I really enjoyed the teaching style and additional information provided by the instructor. Very good course, looking forward to taking more of them as the methodology is very aligned with my ethos of practice"

-Rachel Medow, MT-1 Atlanta, GA, April 2022

"Maitland philosophy will fit well in with my practice."

-Tiffany Meeks, MT-1 Atlanta, GA, April 2022

"This course and instructor (Brian Russ) was extremely engaging and offers a new way to approach solving the puzzle that comes with each patient. I have already seen a shift with my patient care after MT-1 and am very excited to continue the MAPS journey. Huge thank you to Brian Russ. Very awesome, very smart."

-Kristen Anderson, MT1 Atlanta, GA, April 2022

"The seminar was very informative. I learnt so much more about the Maitland's holistic and scientific concept incorporating assessment and patient's input in each step. Definitely stepping out of this seminar feeling more confident to perform evidence based orthopedic manual therapy on patients."

- Pratistha Maharjan, MT-1 New York, NY, April 2022

"I liked the format of the course- no time was spent in "lecture" rather 95% of the course was hands on"

-Meagan Gulmi, MT-1 Philadelphia, PA, March 2022

"Great material, good learning environment."

-David Gertler, MT-1 Philadelphia, PA, March 2022

"Hands-on portion was very helpful in solidifying information learned in powerpoint lecture. Bringing in patients helped see how different aspects of the material can be fit together when assessing/treating a patient."

-Zachary Tionson, MT-1 Philadelphia, PA, March 2022

"I liked the format of the course- no time was spent in "lecture" rather 95% of the course was hands on."

-Meagan Gulmi, MT-1 Philadelphia, PA March 2022

"The continuous examples of how to use the material in clinical settings. Not specific examples, but how to use the concepts."

Mollye Leas, MT-1 Philadelphia, PA, March 2022

"I appreciated that the instructor was passionate about the topic. His replies were clear and consistent with Maitland principles. Both the instructor and lab assistant had really applicable clinical pearls. His instruction was thought out and thorough."

-Clarissa Freeman, MT-1 Corvallis, OR, February 2022

“The pre-course materials felt like an appropriate amount for someone to complete while also working full time. The instructors of the course and the lab assistant were very knowledgeable and had great clinical pearls to provide as well. The bang for the buck with this course is the clinical reasoning behind the method of assessment and treatment can be immediately applied in clinical practice, even if the techniques may require some practice and fine tuning to master.”

-Sara Lindauer, MT-1 Corvallis, OR, February 2022

“The hands-on lab portion of the seminar with feedback from instructors and other clinicians. The ability to interact with the speaker and discuss clinical topics as related to techniques taught in the course as well as different variations for different clinical presentations.”

-Cole Tomlinson, MT-1 Corvallis, OR, February 2022

MT-2: ESSENTIAL SPINAL SEMINAR

"Excellent location and host site staff, and the instructor Michael O'Hearn's knowledge/skill base and teaching ability was stellar. Mr. O'Hearn is clearly an asset to MAPS and to the Manual Therapy realm in general. MT-2 is a valuable manual therapy course, and is highly recommended for any therapist practicing in an outpatient orthopedic setting."

-F. Ward, MT-2 Denver, CO, March 2023

"I loved the instructor and his knowledge of the Maitland approach along with evidence used. The course was a good pace for my learning style and there was great clinical discussion at various times about application and reasoning."

-R. Medow, MT-2 Denver, CO, March 2023

"Overall great course!"

-Blake Pepper-Tunick, MT-2 Denver, CO, March 2023

"I liked learning the techniques to add to my tool box as a PT. I also think the REAL patient eval and treatment was very helpful."

-Meredith Armer, MT-2 Salinas, CA, October 2022

"Michael did an excellent job with demonstration of techniques and allowing for time to practice"

-Kurt R. Munoz, MT-2 Salinas, CA, October 2022

"I appreciated and liked the time spent practicing the treatment techniques and having instructor review one on one. It was especially helpful to practice on the instructor to get feedback on technique."

-J. Diaz, MT-2 Signal Hill, CA, September 2022

"Feedback from the instructor regarding hand placement and body mechanics during manual techniques to ensure the technique is both effective for the patient and safe for me to perform to reduce risk of injury."

-M. Clampitt, MT-2 Signal Hill, CA, September 2022

"I liked learning the new ways of assessing a patient's concordant symptoms of pain and stiffness which really provides me with more tools to obtain information about their symptoms."

-J. Young, MT-2 Signal Hill, CA, September 2022

"I liked that there was a lot of lab/hands on time and not as much lecture."

-L. Buzzell, MT-2 Signal Hill, CA, September 2022

"I enjoyed the mindset, critical thinking, problem-solving, and observation techniques from Maitland instructor and approach. I enjoyed the instructor's teaching style and presence with the information."

-P. Chi, MT-2 Signal Hill, CA, September 2022

"Jody was very knowledgeable and really enjoyed learning what he had to teach. The course was laid out well and really learned from the hands on. Assessment and making that the key to what is going on will be very helpful in my future as a clinician."

-Ryan Smeltzer, MT-2 Birmingham, AL, September 2022

"Jody was great!! He did a great job making everything make since from a practical stand point. Overall, this was the best course I have ever taken. There were so many things that I took away from this course that I will literally begin implementing in my practice tomorrow! I will definitely be attending more of these courses soon."

-Joshua Davis, MT-2 Birmingham, AL, September 2022

"Patient centered. Developing a solid way to hypothesize about a patient and how to treat. Very informative and educational course. Will begin to incorporate this style of treating into my clinic."

-J. Bunn, MT-2 Birmingham, AL, September 2022

"Challenged my current thought process and made me rethink how I will go about assessing and treating my patient in the future. Jody was an excellent teacher and I enjoyed learning from him."

-B. Singletary, MT-2 Birmingham, AL, September 2022

"Jody made this seminar fun. He kept us all engaged and attentive. He was modest, unpretentious, and very accommodating. Having had extensive training with Paris and McKenzie's, I find the Maitland approach truly sensible, practical, clinically sound, and easily applicable in my practice."

-G. Mariano, MT-2 Birmingham, AL, September 2022

"I learned so much about the Maitland school of thought. It enhanced my clinical reasoning for both my manual therapeutic techniques and my clinical decision making."

-M. Mui, MT-2 Blue Bell, PA, September 2022

"The instructor was very knowledgeable and engaging. It was also clear that his knowledge was grounded in clinical experience."

-J. Feeser, MT-2, Blue Bell, PA, September 2022

"very good course, really enjoyed all lab versus doing some lecture"

-Caitlyn Waddington, MT-2 Blue Bell, PA, September 2022

"Big thumbs up to the instructor David. Made the course very fun while passing the knowledge that he had to everyone."

-Jae Lee, MT-2 Blue Bell, PA, September 2022

"I felt like this course was extremely beneficial in helping to develop my assessment skills. It helped me to focus on different aspects of the spine and gave me a few new ways of looking at things. I was able to walk away with tools that I can use day 1 in clinic."

-John Wilkinsor, MT-2 High Point, NC, June 2022

"Overall I really liked the course and plan on attending future Maitland courses."

- T.Rudebeck, MT-2 High Point, NC, June 2022

"I enjoyed the course overall and feel much more confident in my manual skills and treatment philosophy. I have a better understanding for how I want to evaluate a pt and the steps I should be taking to get to a more accurate assessment of how they are presenting.

I am happy to have these new skills as another tool to my PT toolkit."

-C. Tilyou, MT-2 High Point, NC, June 2022

"It would be nice to have a MAPS t-shirt to take home. the forest green and gold logo look awesome. Also, the powerpoints are great but it doesn't allow print so one can use images for educational purposes. Overall, I enjoyed the seminar motivated to finish all seminars."

-D.Winston, MT-2 High Point, NC, June 2022

"Great and knowledgeable instructor, addressed questions thoroughly"

-Sydney G. Williams, MT-2 Missoula, May 2022

"I was challenged to study and expand my knowledge base. I really liked the Maitland concept of pt centered treatment and how to incorporate this new perspective into my current treatment.& I really liked the experience and expertise of the instructor and especially her working with real patients and able to get to the root cause of the disorder and sort the wheat from the chaff.& I liked the hands on approach and getting my hands on various individuals to feel normal and at times abnormal issues."

-Gary James Gales, MT-2 Missoula, May 2022

"Quantity and quality of hands-on lab -- course instructor was excellent! Immediate results from using the great techniques I have learned in this course!"

-Jacqueline Armendin, MT-2 Kendall Park, NJ, May 2022

"Learning and practicing the different techniques and the live patient demonstration was very helpful in seeing the techniques and clinical reasoning being applied during an evaluation "

-A. Bautista, MT-2 Kendall Park, NJ, May 2022

"This was a wonderful course and will be very helpful with continuing my manual therapy skills."

-M.Culver, Mt-2 Kendall Park, NJ, May 2022

"This hands on seminar including live patient demonstration was very effective way to learn the techniques as well as its practical application. I am excited to help my patients with the skills we learnt in the lab."

-P. Maharjan, MT-2 New York, NY, May 2022

"Loved everything about this seminar. The instructor was very knowledgeable and was an excellent presenter."

-J. Ball, MT-2 St Louis, MO, March 2022

"The day after the seminar and I already started to incorporate concepts we learned in the seminar with good outcomes. Very clinically relevant."

-A. Harmston, MT-2 Missoula, MT, May 2022

"I liked the hands on techniques with a skilled instructor in person with the online coursework done prior. I also thought the real patients were an excellent addition to take theories and principles into clinical practice."

-Mark Probasco, MT-2 Chicago, IL, March 2022

"The instructor and assistant were excellent and knowledgeable. They were engaging, positive, and encouraging. They were able to explain the information and techniques and relate them to daily clinical practice."

-A. Hutson, MT-2 Louisville, KY, February 2022

"The MT 2 and MT3 courses have given me the techniques that I utilize most on a daily basis in my practice. The philosophy and background of the courses are excellent!"

-Ethan Brown, MT-2 Louisville, KY, February 2022

"The seminar gave me an opportunity to better organize my thoughts during a spinal examination of my patient's. It gives me a framework to work through that will make my examination and assessments more consistent between patients."

-S. Sears, MT-2 Louisville, KY, February 2022

"Instructors were very skilled. They were both very patient and were able to assist with techniques and answer questions on techniques and rationale quite thoroughly. As my first manual therapy course, I felt like I learnt quite a bit. I would definitely like to attend more of these courses."

-S. Iyer, MT-2 Louisville, KY, February 2022

"Learning to step away from the hard and solid biomechanical model and learning to be more patient centered with focusing more on patient communication and treatment output."

-J. Rosinski, MT-2 Louisville, KY, February 2022

"I am excited to apply new forms of clinical reasoning and skill to patient care!"

-Sabrina Shapiro, MT-2 Washington, DC, January 2022

"Strong focus on EBM. The instructor frequently paused to clinically integrate information. technique being taught."

-K. Corradin, MT-2 Washington, DC, January 2022

"The online material was good so you didn't have to sit through too much lecture. The class was engaging, dynamic and was kept at a good pace."

-A. Rodriguez, MT-2 Washington, DC, January 2022

"The hands on approach was excellent."

-D. Maignel, MT-2 Washington, DC, January 2022

"this is this second time I have taken this course and it was exactly the refresher I was looking for!"

-T. Zelch, MT-2 Washington, DC, January 2022

MT-3: INTERMEDIATE SPINAL SEMINAR

“Excellent course, would recommend to all therapists to enhance clinical skills and diagnostic reasoning. Techniques are applicable from Day 1, and I will be able to use them immediately upon returning to clinic. Demonstrations were clear and concise. This will advance my level of practice and ability to more efficiently evaluate and treat patients and improve outcomes.”

-Kimberly Agan, MT-3 Washington, DC, May 2022

“Travis was a great, funny, and patient instructor. He gave constructive criticism for the manual techniques. Using the mobilization techniques in different ranges of motion and combinations significantly improved my patients' outcomes!”

-M. Bertovich, MT-3 Washington, DC, May 2022

“The amount of lab vs classroom was perfect. The instructor was very knowledgeable and kept us very entertained.”

-Eric A. Blackstone, MT-3 Washington, DC, May 2022

“I always love these MAPS courses as they're incredibly relevant to clinical practice. I consistently leave feeling stronger in my clinical reasoning and hands-on manual therapy skills.”

-K. Lydon, MT-3 Chicago, IL, April 2022

“This course was great at expanding my knowledge on the things I learned in MT 2 and helped to review certain techniques so I felt more confident in performing them.”

- Madasyn L. Howard, MT-3 Edmonds, WA, January 2022

MT-4: DIFFERENTIAL ASSESSMENT & CLINICAL REASONING SEMINAR

"I enjoyed this course. I felt like it really worked to challenge my clinical reasoning skills and push me to be a better clinician."

-John Wilkinson, MT-4 Fredericksburg, VA, December 2022

"Great course, brings together all content taught in previous courses"

-M. Kostraba, MT-4 Fredericksburg, VA, December 2022

"I like that with these seminars they build on each other, and I get to fine tune the skills/techniques I learned in previous MAPS courses. I also like that I never felt embarrassed or uncomfortable if I didn't understand anything, or needed help with some of the hands on techniques"

-Madasyn L. Howard, MT-4 Fredericksburg, VA, December 2022

"This course increased my confidence in ruling in and ruling out different body regions. It also helped me refine hand placement, pressure, and body positioning for manual therapy techniques. I was able to return to the clinic with physical and cognitive knowledge that I could immediately put into practice."

-Kimberly Agan, MT-4 Fredericksburg, VA, December 2022

"Dave always does an awesome job taking the skills & putting them into a clinical setting or situation"

-B. Bannister, MT-4 Suffolk, VA, August 2021

"hands on treatments"

-G. Peacock, MT-4 Suffolk, VA, August 2021

"it connected all the other courses together"

-Tony Mirovsky, MT-4 Suffolk, VA, August 2021

"hands on/differential assessment"

-R. Mcfarland, MT-4 Nashville, TN, November 2021

"Great setting for both didactic & clinical learning; good patient examples (live pt); good practical application examples given throughout"

-Amy Morris, MT-4 Nashville, TN, November 2021

"Excellent course for fine tuning skills and teaching differential subjective information needed to properly diagnose source."

-Amy Morris, MT-4 Nashville, TN, November 2021

"The differential diagnosis & clinical reasoning pieces were very helpful & I liked the review of the treatment techniques & assessment."

-Erica Nicholson, MT-4 Nashville, TN, November 2021

"I really enjoyed the course & feel like it is very applicable to my patients."

-Erica Nicholson, MT-4 Nashville, TN, November 2021

MT-FMC: MOTOR CONTROL STRATEGIES TO MAXIMIZE REHABILITATION & FUNCTION

"Lots of opportunity to practice the techniques. It was very hands on which I find most helpful."

-A. Watroba, MT-FMC Camarillo, CA, March 2023

"Clare is just fabulous. She really is so knowledgeable and helpful. I was so pleased with this course"

-W. Greene, MT-FMC Camarillo, CA, March 2023

"I like that there was ample lab time for practice. I would highly recommend this course to my colleagues."

-B. Cabral, MT-FMC Camarillo, CA, March 2023

"The emphasis was on clinical reasoning, assessment and treatment skills. We did not have to sit for hours listening to a lecture at the course. Though the video was long and exhausting. I appreciated that it was broken down into segments and you could stop and start at will."

-T. Roberts, MT-FMC Camarillo, CA, March 2023

"I loved how in depth and comprehensive the progressions and regressions of the exercises were in the manual for this course. I feel like I will reference this manual for years to come. I also thought that Clare was an amazing instructor who controlled the room while also being very personable and entertaining. She had an answer for every question that was asked and she was a treasure trove of information. I thought it was wonderful."

-Z. Jones, MT-FMC Camarillo, CA, March 2023

"Claire, she's awesome!"

-H. Frost, MT-FMC Camarillo, CA, March 2023

"I liked how well this seminar ties together other courses (MT 1/MT 2) with training concepts that are highly encountered in the practice setting. The case studies were very effective for the learning objectives."

-Sara Lindauer, MT-FMC Camarillo, CA, March 2023

"Clare is a great instructor, knowledgeable and helpful without being derogatory or demeaning in her comments if someone answered wrong or asked a question. Great course with a lot of valuable information"

-G. Harris, MT-FMC Camarillo, CA, March 2023

"This course has very applicable information that can be used clinically immediately. Clare was amazing!"

-Sejal Doshi, MT-FMC Camarillo, CA, March 2023

"The instructor was very engaging and I liked his use of his discussions about actual patients he treated in his clinic and how they related to what we were learning. I really enjoyed this course and it will provide great value to how I practice."

-Ryan Fontaine, MT-FMC Totowa, NJ, November 2022

"I love MAPS Courses and use them. I get GREAT results with my patients. I love how Instructors explain everything and emphasize on importance of assessment and so many different techniques learned during each course. Thank you so much! Reviewing entire subjective, objective and assessment of each body region and prescribing exercises based on the findings. Also, it was nice to review special test and have it outlined based on which ones to use based on the each topic such as FIA, cervical instability, etc. It was a good practice to do in class case study/review along with overnight home cast study and having extra case study for extremity.FMC helped to put everything together. Instructor made the course interesting by sharing his experience and making sure that we understood each topic, tests and exercises. He was willing to stay extra after class to review anything we did not understand or if we had any questions. Thank you so much for making this course AMAZING."

-U. Patel, MT-FMC Totowa, NJ, November 2022

"Loved the course and want to take additional Maitland courses. I liked the interaction between instructor and students, the questions, and the lab"

-Karen Dawn Priest, MT-FMC Dyersburg, TN, October 2022

"Norm presented the material well and allowed us to go at a great pace."

-Dana C. Fussell, MT-FMC Dyersburg, TN, October 2022

"Norm was awesome and very knowledgeable and personal. Had great personal examples. Very patient and encouraging."

-W. Greene, MT-FMC, Dyersburg, TN, October 2022

"Attending the Maitland Course was a great experience with both days focusing on manual/lab activities. Pre-seminar reading and preparation for the class was a good experience and enhanced the weekend course. The expertise of the instructor Norm Ayotte was great with a relaxed environment while covering a lot of material. Chip Ladd PT ATC"

-Larry D Ladd Jr., MT-FMC Dyersburg, TN, October 2022

"The lab practice and lecture balance with excellent interaction with the instructor a classmates."

- V. Connelly, MT-FMC Decatur, GA, September 2022

"I really enjoyed the aspect of bringing together the scientific evidence regarding the MS dysfunction with EBM on clinical assessment along w/ current exercise prescription strategies "

-J. Hojnacki, MT-FMC Decatur, GA, September 2022

"I always like Maitland seminars because they are applicable and full of useful and useable information. The instructor (Brian Russ) was very interested in the material and in our understanding the material. Genuinely wanted to make it a good investment of our time and for practice usefulness."

-T. Butler, MT-FMC, Decatur, GA, September 2022

"The instructors are always a great part of the seminar. I also appreciated the updates in the research and that it was relevant as well as the at home portions."

-Kathleen Fortier, MT-FMC Havertown, PA, June 2022

"This class was great! Thank you for all the relevant and useful information"

-Lucie D. Casiello, MT-FMC Chicago, IL, May 2022

“online section to be completed at my own pace and be able to replay sections if needed the way the manual is structured for each area - shoulder, knee, tuneful hints and ideas to improve my clinical skills and to think about patients differently”

-Martina Azizi, MT-FMC Chicago, IL, May 2022

“The seminar gave a good review of common anatomical/physiological conditions seen in outpatient clinics and then helped to fine tune exercise prescription with useful tips on how to improve commonly used exercises and how to adequately progress those exercises. I will use many of these exercises moving forward. Steve was an excellent and engaging instructor that kept the class engaged for the entire duration of the course.”

-Jonathan Cerqua, MT-FMC Chicago, IL, May 2022

“The course was great with a lot of good review and new information tied together. Home lectures were good as well. Clare was a great instructor and got the class to all participate.”-

-C. Tomlinso, MT-FMC Portland, OR, April 2022

“I enjoyed all of the hands-on lab time with demonstration first. I liked the alterations to exercises, special tests, and treatment techniques.”

-S. Carbone, MT-FMC Ft. Wayne, IN, March 2022

“I love the course modification and additions from previous stabilization course to include the latest research and updated treatment methods that incorporate manual treatment as well as therapeutic exercise and motor control exercises for treatment of the lumbar, cervical spine and the shoulder, hip, knee and ankle. Very practical for the patients we see every day and ready to apply in treatment on “Monday morning” after the course. Appropriate balance and attention to principles, new concepts based on peer reviewed research and evidence-based medicine and techniques for optimal patient outcomes.”

-Kristen Klingen, MT-FMC Clearwater, FL, March 2022

“I always enjoy the amount of hands-on lab time allowed during MAPS courses and the knowledgeable instructors.”

-Jamie Morelock, MT-FMC Clearwater, FL, March 2022

“I have taken Maitland courses since 2000 and have been certified COMT since 2013. There are only 2 [courses] I have not taken at this point. This was a fantastic review of present literature, learning new, evidence informed exercise interventions and manual techniques with a fun and engaging instructor. Marrow was fantastic!”

-Tracy Strobel, MT-FMC Clearwater, FL, March 2022

“I thought the video presentations were awesome- really liked all the research based information given credibility to physical approaches I always enjoyed improving my knowledge so I can give better care to my patients. I am amazed that after 41 years in the field I continue to learn through all of the MAPS courses I have attended, Marrow did a fantastic job - he is impressive in his knowledge base and in his ability to effectively communicate and share this knowledge “

-Amy Woods, MT-FMC Clearwater, FL, March 2022

MT-SIJ: SACROILIAC JOINT & PELVIS SEMINAR

“Great course that really helped me gain more confidence treating the SIJ with great knowledge provided in helping rule in/out SIJ, examination techniques when looking at the SIJ, and manual techniques to help treat. “The course was very well organized. I felt the course did an excellent job at ways to rule in/rule out SIJ pain and then provided great manual techniques to help treat this area. The course was very well organized. I felt the course did an excellent job at ways to rule in/rule out SIJ pain and then provided great manual techniques to help treat this area.”

-Jana C. Ruddy, MT-SIJ, Chicago, IL, September 2022

“Great pace of instruction. An appropriate amount of review given the experience level of the clinicians taking the class. Good mix of lecture and lab.”

-K. Moffatt, MT-SIJ, Chicago, IL, September 2022

“The instructor made the material applicable to the clinical setting. She engaged the participants' clinical expertise and experience to enhance the learning.”

-Bill Hitchcock, MT-SIJ, Chicago, IL, September 2022

“Great Maitland team instructing this class. I enjoyed the course very much. I came away with some great clinical pearls and improved hands on skills to identify and treat SIJ dysfunction. Thanks Maitland team for putting together a TERRIFIC program. I am looking forward to attending more Maitland sessions. I like the class size and having two instructors available to provide feedback during the labs skill sessions.”

- J. Blazey, MT-SIJ, Totowa, NJ, April 2022

“How thorough the labs were. Class was small so I was able to get feedback from instructors and other clinicians on how I was doing with certain hand placements and techniques.”

-Ashley Ferreira, MT-SIJ, Totowa, NJ, April 2022

“Trish Fong was by far the best part of the course. She is an exceptionally gifted and generous teacher. She has mad skills, amazing hands, and a fabulous personality. She really is a born teacher, and explains concepts in a very approachable way using a lot of humor and personal experiences. MAPS should feel pretty lucky to have her!”

-Elizabeth Anne Pastore, MT-SIJ San Clemente, CA, March 2022

“The SIJ can be very complex in terms of the many theories that exists in rehabilitation. Trish used evidence and experience to guide us through this complex joint. There was a logical flow through the anatomy, function, testing to intervention. Along the way, Trish taught in a manner that we could relate and made it easy to remember. She brought the evidence and the subject to life.”

-Nicholas Karashima, MT-SIJ, San Clemente, CA, March 2022

“I just wanted to say thanks to MAPS and particularly Trish for providing a clearer perspective on this topic. She made the course fun and provided high quality from the lecture to the hands on portions of the class. This has allowed me to provide a higher level of care to my patients. “

-Nicholas Karashima, MT-SIJ San Clemente, CA, March 2022

“enjoyed the topic and appreciated that course included info about associated joints/tissues and differentiation”

-Christopher Kuhn, MT-SIJ San Clemente, CA, March 2022

“Good course focused on a specific region of the body and brings detail to the region that helped to enhance my understanding and clinical reasoning in dealing with this region with my patients.”

-G. Harris, MT-SIJ San Clemente, CA, March 2022

“The way the material was delivered kept me engaged. The course is more practical evidence based practices and has techniques that i can use at the clinic right away . Good course for both seasoned and introductory therapists”

-M. Thadani, MT-SIJ San Clemente, CA, March 2022

MT-O: EVIDENCE-BASED ORTHOPEDIC DIAGNOSTIC EVAL

"Lab time to learn and review mobilizations as well as the quarter screens and special tests. This course has made me excited to take another MAPS course. Very well done!"

-C. DeRosa, MT-O Wyomissing, PA, March 2023

"Dave was great. Expert level knowledge, answered all questions."

-Joan G. Sabine, MT-O Wyomissing, PA, March 2023

"Dave is an excellent instructor. Very interesting patient examples, case studies. Material is immediately applicable."

-Jacqueline Armendinger, MT-O Wyomissing, PA, March 2023

"I love the instructor; super concise and very good in explaining all concepts and tying it back to everyday clinical use. MT-O was the best in explaining and/or summarizing the essence of the Maitland Approach. It had all the big pictures, the research behind everything, and introduced the major concepts so that if one wanted more, you can jump right into MT1-4 and get deeper understanding."

-J. Lee, MT-O Wyomissing, PA, March 2023

"I always feel so engaged and rejuvenated when I leave a MAPS course!"

-Jen Pesterfield, MT-O Nashville, TN, April 2022

"All the information was applicable to practice, extensive hands on/lab"

-Heather McKnight, MT-O Nashville, TN, April 2022

"Lab, all the information with helpful tidbits. Information is applicable to practice. Can do new things tomorrow to help my practice."

-E. Bradford, MT-O Nashville, TN, April 2022

"Course instructor was very informed, she used her clinical experience & knowledge as well to make this an excellent class. I will use these techniques in the clinic!"

-Meredith Auerbach, MT-O New York, NY, January 2022

"I can use the material & information I learned in this course & incorporate it immediately into my practice."

-Hussein Ahmad, MT-O New York, NY, January 2022

MT-UC: UPPER CERVICAL SEMIANR

"This was a great course! Would recommend to colleagues/coworkers! Lab portions really reinforce treatment techniques discussed in lecture. Steve was very knowledgeable and provided good examples and answers to any questions throughout the class. Good patient scenarios during the last day of class for critical thinking and to implement techniques learned throughout the weekend course."

-Christian L. Hollis, MT-UC Chicago, IL, December 2022

"Steve's style of teaching the material. Feedback provided during lab sessions. Time allotted to cover each section. Good discussion during course. I really enjoyed this course and feel I learned evaluation and treatment techniques that I can immediately take back to the clinic and start using. Steve was a great instructor! Knowledgeable, approachable, and provided regular feedback."

-Kathleen M. Prampin, MT-UC Chicago, IL, December 2022

"The small class size was great. We had a lot of time to ask questions and get insights on treatment protocols and new ideas for treatment of vestibular, concussion and TMD patients."

-Kirsten Gaines Transue, MT-UC Chicago, IL, December 2022

"Steve was great. enjoyed the puns to keep things light. enjoyed the clinical examples and stories from his career. Appreciate the effort he put in to prepare for the course (equipment, take home sheets, summary clinical decision making worksheet at end of course.)"

-J. Blienfernicht, MT-UC Chicago, IL, December 2022

"Time spent doing labs was the most enjoyable and fruitful time. Also the style of the instructor's teaching was excellent. Steve is an excellent educator and made sure that everyone felt comfortable and engaged in the learning process."

-Ahmad Reza Behrouzi, MT-UC Chicago, IL, December 2022

"The Clinical Reasoning approach to CGH, CGD, Vestibular, TMJ, and Concussion was a good foundation to begin effectively treating these types of patients. I have taken many MAPs courses over the years and have done achieved my COMT. Throughout my experience with MAPs this has been my favorite aspect of all your courses...Strong clinical reasoning with sound manual therapy methods has transformed my practice and improved the lives of my patients! Many thanks to MAPs and all your instructors."

-John Pearson, MT-UC Denver, CO, September 2022

"Course was very information and it gave me a better understanding on how to treat patients with various upper cervical spine issues."

-R. McFarland, MT-UC Chicago, IL, December 2022

"This course was great review for the topics I am familiar with and good foundation for the topics I am less familiar with. Colette is very engaging and has excellent knowledge base for instructing."

-Sharyn Jones Smith, MT-UC Denver, CO, September 2022

"Clarifying various types of dizziness; lab was great; small class size awesome!"

-Catherine Kuba, MT-UC Lutz, FL, August 2022

“Instructor helps us understand the content. The content lends itself to being able to use the information and or techniques the next day in the clinic. “

-K. Zbaraschuk, MT-UC Lutz, FL, August 2022

“Great interaction and one on one instruction by Rob during lab as needed, significant lab time and ability to share examples of daily use. The information learned is easy to take into the clinic.”

-Ann Samuelson Tonkin, MT-UC Columbus, OH, April 2022

“Learning new manual techniques for assessing and addressing upper cervical spine pathology as relates to headaches and dizziness. Review of TMJ Dysfunction to increase my confidence in assessing addressing issues in this area, which I often refer out to other PTs for. Rob was very engaging and did a great job of keeping the energy level and engagement high during this long weekend course!”

-C. Catrone, MT-UC Columbus, OH, April 2022

“always like the lab time- smaller class this time so felt like it was easier to get some one-on-one attention when needed.”

-A. Dutiel, MT-UC Columbus, OH, April 2022

“The information was VERY applicable and useful and I feel I will be able to expand my practice after having taken this course. I also feel more confident in my ability to screen patients for sinister pathology.”

-Katherine A. Brandolini, MT-UC Columbus, OH, April 2022

MT-G: GERIATRIC MANUAL THERAPY SEMINAR

"I loved the detail on age related changes! I feel the course definitely challenged my thought process on applying the physiological changes while applying the appropriate Techniques to enhance functional mobility. Also, Marrow was a phenomenal instructor and he delivered the course materials and lab techniques very effectively! Overall, a great course with majority being hands on! You can take these techniques that could be used on wide range of patients across the lifespan as well as Geriatrics!"

-Michael A. Lusk, MT-G Clearwater, FL, September 2022

"Marrow was an excellent instructor. He adapted well to the demands and learning styles of the class. The patient demonstrations were quite helpful to show clinical theory put into practice."

-Bryan Regar, MT-G Clearwater, FL, September 2022

"Have enjoyed MAPS courses more than ANY other courses I have taken"

-M. Howell, MT-G, Clearwater, FL, September 2022

"Marrow is an excellent teacher. I appreciate the time he took demonstrating each skill, answering questions and providing feedback."

-J. Regar, MT-G, Clearwater, FL, September 2022

"I liked most the hands-on techniques that I can use right away"

-H. Ahmad, MT-G New York, NY, March 2022

MT-M: SPINAL & PERIPHERAL MANIPULATION SEMINAR

"Variety of techniques & anecdotal discussion of concepts"

-Michael C. Palermo, MT-M Havertown, PA, April 2022

"The amount of hands on time and thoroughness of content"

-Sarah Abbonitio, MT-M Havertown, PA, April 2022

"Class size to instructor ratio. There was adequate time spent for the lab portion."

-Brittney Holt, MT-M Havertown, PA, April 2022

"Open discussion, hands on learning, instructors gave plenty of time for practice"

-Albert Sagnella, MT-M Havertown, PA, April 2022

"Instructor Brian was extremely knowledgeable and willing to provide a good experience. Addison was excellent with her instructions on manual techniques."

-Albert Sagnella, MT-M Havertown, PA, April 2022

"Great Experience!"

-George Rodriguera, MT-M Havertown, PA, April 2022

"This course will be a great addition to my clinical skills and Darren was an amazing and knowledgeable instructor"

-Ryan Nelson, MT-M Ft. Wayne, IN, April 2022

MT-MC

MT-1: ESSENTIAL PERIPHERAL SEMINAR - REMOTE LIVE

“Chris was of course, as expected, very knowledgeable. I really appreciate him sharing not only his professional expertise, but also his life experiences.”

-Roy Asuncion, MT-1R, January 2022

“I really appreciated the importance of the assessment - taking the patient subjective exam and matching that information up with the clinical exam - and not relying solely on diagnostic testing results.”

-C. Stayeas, MT-1R, January 2022

“Enjoyed the course and the instructor very much. Left the course feeling more confident in my manual skills and more techniques to utilize”

-Lee Preston, MT-1R, September 2021

“I really enjoyed the course and will be implementing the new techniques in my patient sessions whenever I can. I am looking forward to taking additional MAPS courses!”

-J. Hoffman, MT-1R, September 2021

“Dynamic setting, most of the theory and evidence was presented in the pre-course materials making it possible to dive deeper into the techniques. The presenter was extremely knowledgeable and willing to help if there was difficulty with a given technique”

-Aaron Anderson, MT-1R, September 2021

MT-2: ESSENTIAL SPINAL SEMINAR - REMOTE LIVE

“Chris was excellent in his presentation of the content and made the seminar interesting and relatable.”

-T. Trombley, MT-2R, March 2022

“I really enjoyed this course and found it very informative. It will definitely improve my clinical skills and I am excited to practice the concepts I was taught to help my patients.”

-Ryan Fontaine, MT-2R, January 2022

“Awesome instructor, very knowledgeable, kept everything moving in a timely manner and interesting.”

-R. Nez, MT-2R, January 2022
