

## MT-UC: Upper Cervical Seminar

*"Lab portions really reinforce treatment techniques discussed in lecture. Steve was very knowledgeable and provided good examples and answers to any questions throughout the class. Good patient scenarios during the last day of class for critical thinking and to implement techniques learned throughout the weekend course. This was a great course! Would recommend to colleagues/coworkers!"*

**-Christian L. Hollis, MT-UC Chicago, IL, December 2022**

*"Steve's style of teaching the material. Feedback provided during lab sessions. Time allotted to cover each section. Good discussion during course. I really enjoyed this course and feel I learned evaluation and treatment techniques that I can immediately take back to the clinic and start using. Steve was a great instructor! Knowledgeable, approachable, and provided regular feedback."*

**-Kathleen M. Prampin, MT-UC Chicago, IL, December 2022**

*"The small class size was great. We had a lot of time to ask questions and get insights on treatment protocols and new ideas for treatment of vestibular, concussion and TMD patients."*

**-Kirsten Gaines Transue, MT-UC Chicago, IL, December 2022**

*"Steve was great. enjoyed the puns to keep things light. enjoyed the clinical examples and stories from his career. Appreciate the effort he put in to prepare for the course (equipment, take home sheets, summary clinical decision making worksheet at end of course.)"*

**-J. Blienfernicht, MT-UC Chicago, IL, December 2022**

*"Time spent doing labs was the most enjoyable and fruitful time. Also the style of the instructor's teaching was excellent. Steve is an excellent educator and made sure that everyone felt comfortable and engaged in the learning process."*

**-Ahmad Reza Behrouzi, MT-UC Chicago, IL, December 2022**

*"Course was very information and it gave me a better understanding on how to treat patients with various upper cervical spine issues."*

**-R. McFarland, MT-UC Chicago, IL, December 2022**

*"The Clinical Reasoning approach to CGH, CGD, Vestibular, TMJ, and Concussion was a good foundation to begin effectively treating these types of patients. I have taken many MAPs courses over the years and have done my COMT. Throughout my experience with MAPs this has been my favorite aspect of all your courses. Good clinical reasoning with sound manual therapy methods has transformed my practice and improved the lives of my patients! Many thanks to MAPs and all your instructors."*

**-John Pearson, MT-UC Denver, CO, September 2022**

*"This course was great review for the topics I am familiar with and good foundation for the topics I am less familiar with. Colette is very engaging and has excellent knowledge base for instructing."*

**-Sharyn Jones Smith, MT-UC Denver, CO, September 2022**

*"Clarifying various types of dizziness; lab was great; small class size awesome!"*

**-Catherine Kuba, MT-UC Lutz, FL, August 2022**

*“Instructor helps us understand the content. The content lends itself to being able to use the information and or techniques the next day in the clinic. “*

**-K. Zbaraschuk, MT-UC Lutz, FL, August 2022**

*“Great interaction and one on one instruction by Rob during lab as needed, significant lab time and ability to share examples of daily use. The information learned is easy to take into the clinic.”*

**-Ann Samuelson Tonkin, MT-UC Columbus, OH, April 2022**

*“Learning new manual techniques for assessing and addressing upper cervical spine pathology as relates to headaches and dizziness. Review of TMJ Dysfunction to increase my confidence in assessing addressing issues in this area, which I often refer out to other PTs for. Rob was very engaging and did a great job of keeping the energy level and engagement high during this long weekend course!”*

**-C. Catrone, MT-UC Columbus, OH, April 2022**

*“always like the lab time- smaller class this time so felt like it was easier to get some one-on-one attention when needed.”*

**-A. Dutiel, MT-UC Columbus, OH, April 2022**

*“The information was VERY applicable and useful and I feel I will be able to expand my practice after having taken this course. I also feel more confident in my ability to screen patients for sinister pathology.”*

**-Katherine A. Brandolini, MT-UC Columbus, OH, April 2022**
